PROFESSIONAL SUMMARY

Full Stack Engineer with 5+ years of experience designing and developing scalable web and cross-platform mobile applications using Vue.js, Flutter, and Laravel. Strong expertise in RESTful API architecture, authentication systems, modular frontend design, and performance optimization. Experienced in building production-grade warehouse management systems, customer portals, and ecommerce platforms for B2B and client-facing environments. Focused on clean architecture, maintainable codebases, and secure system design.

TECHNICAL SKILLS

Frontend: Vue.js, HTML5, CSS3, Bootstrap, JavaScript

Mobile: Flutter (State Management: Provider), Cross-platform Development

Backend: Laravel (MVC Architecture, REST APIs, Authentication, Payment Integrations)

Database: MySQL, SQL Server, Oracle

Tools & Practices: Git, Postman, VS Code, Android Studio, Agile/Scrum, API Testing

Services & Integrations: Firebase, FCM Push Notifications, Razorpay, Cashfree

WORK EXPERIENCE

Frontend Developer | Wegloc Consulting UG | Sep 2025 – Present

Product: Wegloc Warehouse Management System (Production Admin Panel – Login Protected)

Live URL: https://app.wegloc.com (Admin Panel – Restricted Access)

- Architected and developed core frontend modules for a production-grade warehouse management system using Vue.js and Laravel.
- Designed scalable dashboard architecture with modular components and optimized API consumption strategies.
- Developed a dedicated customer portal platform enabling client customers to access order tracking, returns management, and workflow updates.
- Implemented authentication flows, role-based access controls, and secure API communication.

- Improved application responsiveness through performance tuning and efficient state handling.
- Collaborated in Agile sprints, participated in feature planning, debugging, and code reviews.

Software Engineer | FWF Fulfilment + Logistik GmbH | May 2024 – Sep 2025

- Developed warehouse automation portal supporting order lifecycle and inventory management workflows.
- Built cross-platform warehouse mobile application using Flutter with real-time synchronization.
- Integrated notification systems and automated operational workflows.
- Optimized backend queries and enhanced API response efficiency for stable production performance.
- Ensured maintainable code structure following MVC and modular architecture principles.

Flutter Developer | Asaso Tech Pvt. Ltd. | Jun 2022 – May 2024

- Developed ecommerce mobile applications with secure payment gateway integrations (Razorpay, Cashfree).
- Integrated Google Maps SDK, real-time chat systems, and push notification services.
- Designed reusable UI components and implemented structured state management using Provider.
- Collaborated with backend team for REST API integration and feature deployment cycles.
- Handled debugging, performance optimization, and production release management.

Mobile & Backend Developer | Ubgot Software Pvt. Ltd. | Oct 2020 – May 2022

- Developed cross-platform mobile applications integrated with Laravel-based REST APIs.
- Implemented secure authentication systems and transaction workflows.
- Designed database schemas and optimized backend performance.
- Maintained version control workflows using Git.

Mobile & Backend Developer | Eventos Hub Pvt. Ltd. | Aug 2019 – Oct 2020

- Built event management application supporting media uploads, invitations, and user engagement features.
- Integrated Google Maps, FCM notifications, and backend services using Laravel.
- Developed REST APIs and assisted in deployment and production maintenance.
- Collaborated with cross-functional teams to deliver feature enhancements.

EDUCATION

B.Tech in Computer Science & Engineering | Anand International College of Engineering | 2020 | 72% (Honors)
